                                                                                              SHORT SECRETED FORM, EXIST DUE TO ALTERNATIVE SPLICING.

TISSUE SPECIFICITY: EPITHELIAL TISSUES AND BRAIN.

DOMAIN: THE CYTOPLASMIC PART OF THE RECEPTOR MAY INTERACT WITH
SH2 OR SH3 DOMAINS OF MANY SIGNAL-TRANSDUCING PROTEINS.

PTM: LIGAND-BINDING INCREASES PHOSPHORYLATION ON TYROSINE RESID
AND PROMOTES ITS ASSOCIATION WITH THE BB5 SUBUNIT OF
PHOSPHATIDYLINOSITOL 3-KINASE (BY SIMILARITY).

DISEASE: OVEREXPRESSED IN A SUBSET OF HUMAN MAMMARY TUMORS.

SIMILARITY: BELONGS TO THE EGF RECEPTOR FAMILY.
                                                                                                                                                                                                                                            SUBCELLULAR LOCATION: SECRETED (SHORT FORM)

                                                                  ALTERNATIVE PRODUCTS: 3 ISOFORMS; TYPE I (SHOWN HERE), TYPE II
TYPE III; ARE PRODUCED BY ALTERNATIVE SPLICING.
TISSUE SPECIFICITY: UBIQUITOUSLY EXPRESSED IN EMBRYOS. IN LARV
UNIFORM EXPRESSION IS SEEN IN WING DISKS, GENITAL DISK, ANLAGE
TESTIS AND OVARY, AND BRAIN CORTEX. IN EYE-ANTENNA DISK, HIGHE
EXPRESSION IS ANTERIOR TO MORPHOGENETIC FURROW, LEVELS REMAIN
IN PHOTORECEPTOR PRECURSOR CELLS. THIS PATTERN IS REVERSED IN
POSTERIOR EYE DISK. IN ADDLIS EXPRESSION IS HIGH IN BRAIN CORT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          FUNCTION: BINDS TO FOUR LIGANDS: SPITZ, GURKEN, VEIN AND ARGOS, WHICH IS AN ANTAGONIST. TRANSDUCES THE SIGNAL THROUGH THE RAS-RA MAPK PATHWAY. INVOLVED IN A MYRIAD OF DEVELOPMENTAL DECISIONS. CRITICAL FOR THE PROLIFERATION OF IMAGINAL TISSUES, AND FOR THE DETERMINATION OF BOTH THE ANTERO-POSTERIOR AND DORSO-VENTRAL POLARITIES OF THE COCYTE. IN THE EMBRYO, PLAYS A ROLE IN THE ESTABLISHMENT OF VENTRAL CELL FATES, MAINTENANCE OF AMNIOSEROSA AND VENTRAL NEUROECTODERMAL CELLS, GERN BAND RETRACTION, CELL FA SPECIFICATION IN THE CENTRAL NERVOUS SYSTEM AND PRODUCTION OF
   AND THORACIC AND ABI
SIMILARITY: BELONGS

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     MOL.
                                                                                        FUNCTION: Tyrosine kinase receptor required fo vulval differentiation. Possible receptor for required for vulval development. Activated by way of let-60 RAS. The lin-3/let-23 pair is a of the mammalian neuregulin-ERBB network.

CATALYTIC ACTIVITY: ATP + a protein tyrosine -
  tyrosine phosphate.
SUBCELLULAR LOCATION: Type I membrane protein.
apical membrane of cell junctions in epithelia.
cells.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         an R.V., Koga
